

+

Decide what you want to listen to.

Introduction

High level entertainment!

Where did the initiative come from?

That's easy! Hip hop is very dear to my heart. I listen to online radio very often and I haven't found anything related to underground hip hop. I searched YouTube hoping that I would find radio with tracks of unknown artists or those who are known in their own circle. I wanted to listen to something new and not mainstream. I didn't find it.

I've decided I could create radio with such music. On YouTube, most radios are foreign and I want to listen to Polish underground rap.

Information portal

Find out more about the underground artists

Information portal in which articles connected with music will be posted.

All payments for the marketing service, interview or sponsored articles will be accepted in MC token.

Radio tokenization

Why do I want to do it?

I am planning to do something noone has ever done before.

I am going to use token(MC) for monetization and share the profit from token with rappers who share their music in the radio.

How to calculate the remuneration for the artist?

A key issue will be the amount of collected tokens and the number of tracks which were played in the radio every month. Maximum 10 tracks per one artist.

Market

Earn money thanks to your services on Market!

Market will let you post your service or music.

Music producers will be able to present their soundtracks and rappers/vocalists will have a chance to record vocals to their music.

There'll also be some place for graphic designers and editors.

Every Market payment will be accepted in a form of a token but there will also be the possibility to pay with a credit card, blik or bank transfer.

*Information for investors

After the launch of the information platform and Market we will probably create a new token.

*If it happens, it will be possible to exchange MC token in ratio 1:1.

DeFM platform

Decentralized radio

The very first decentralized radio platform where it's the audience's decision what should be played on the radio not the owners' one.

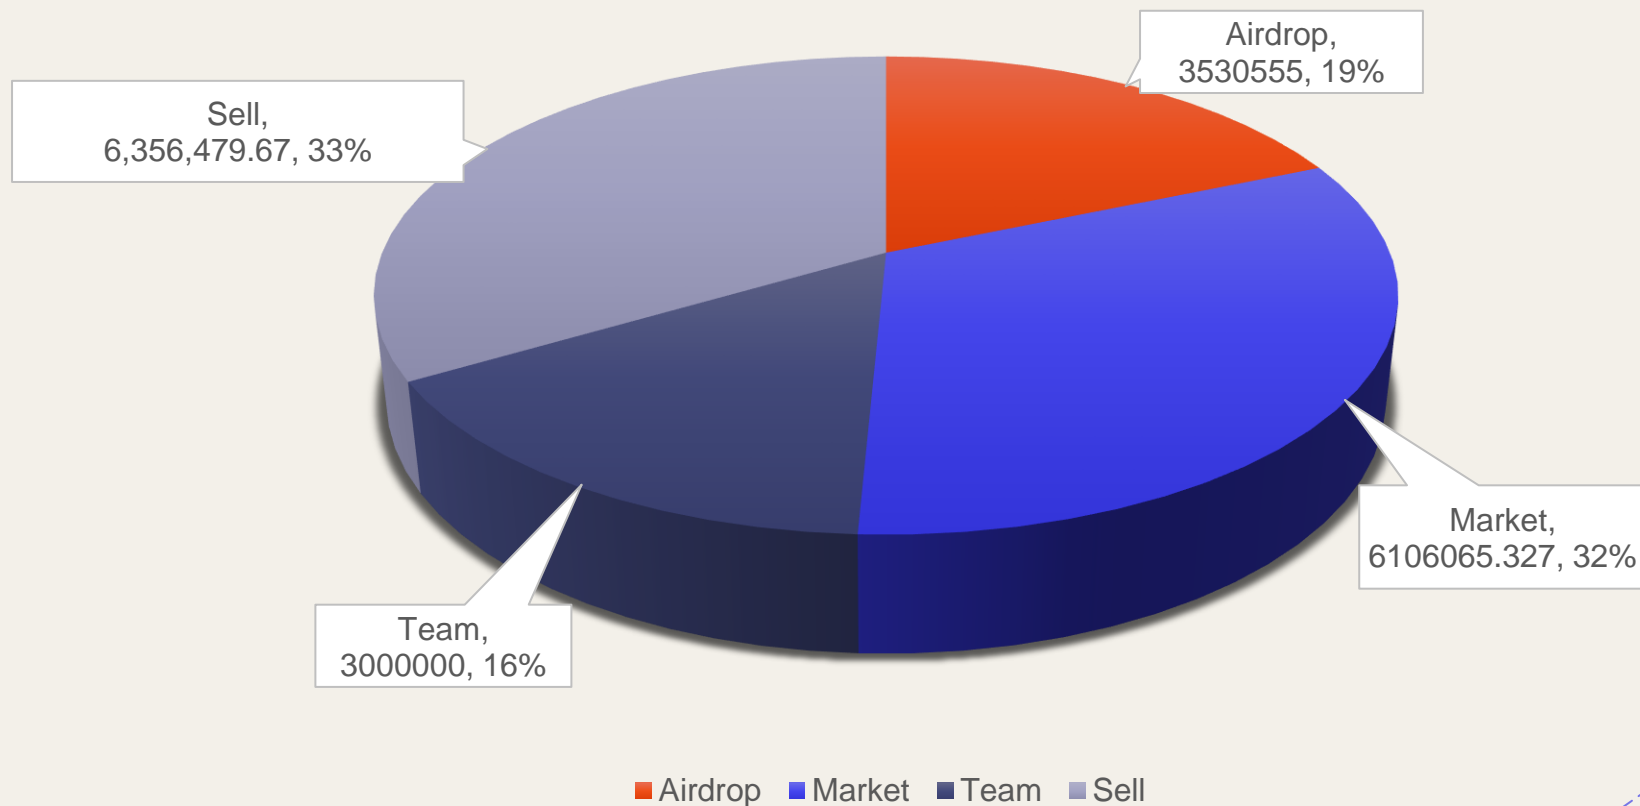

The platform will be blockchain-based.

Functioning of the radio:

Tekonomia MC

Distribution tokens MC (ETH/Matic)

Timeline

Launch of the radio

the first stream on YouTube platform

01

Information Platform and "Market"

Extension of the activity to information portal and "market"

03

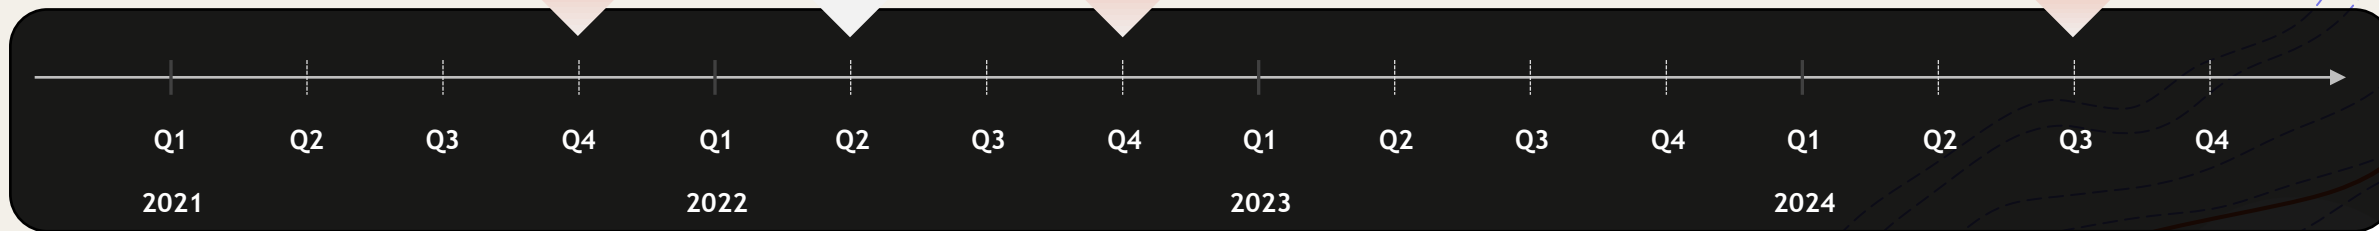

Radio Tokenization

The first enrollment of MC tokens

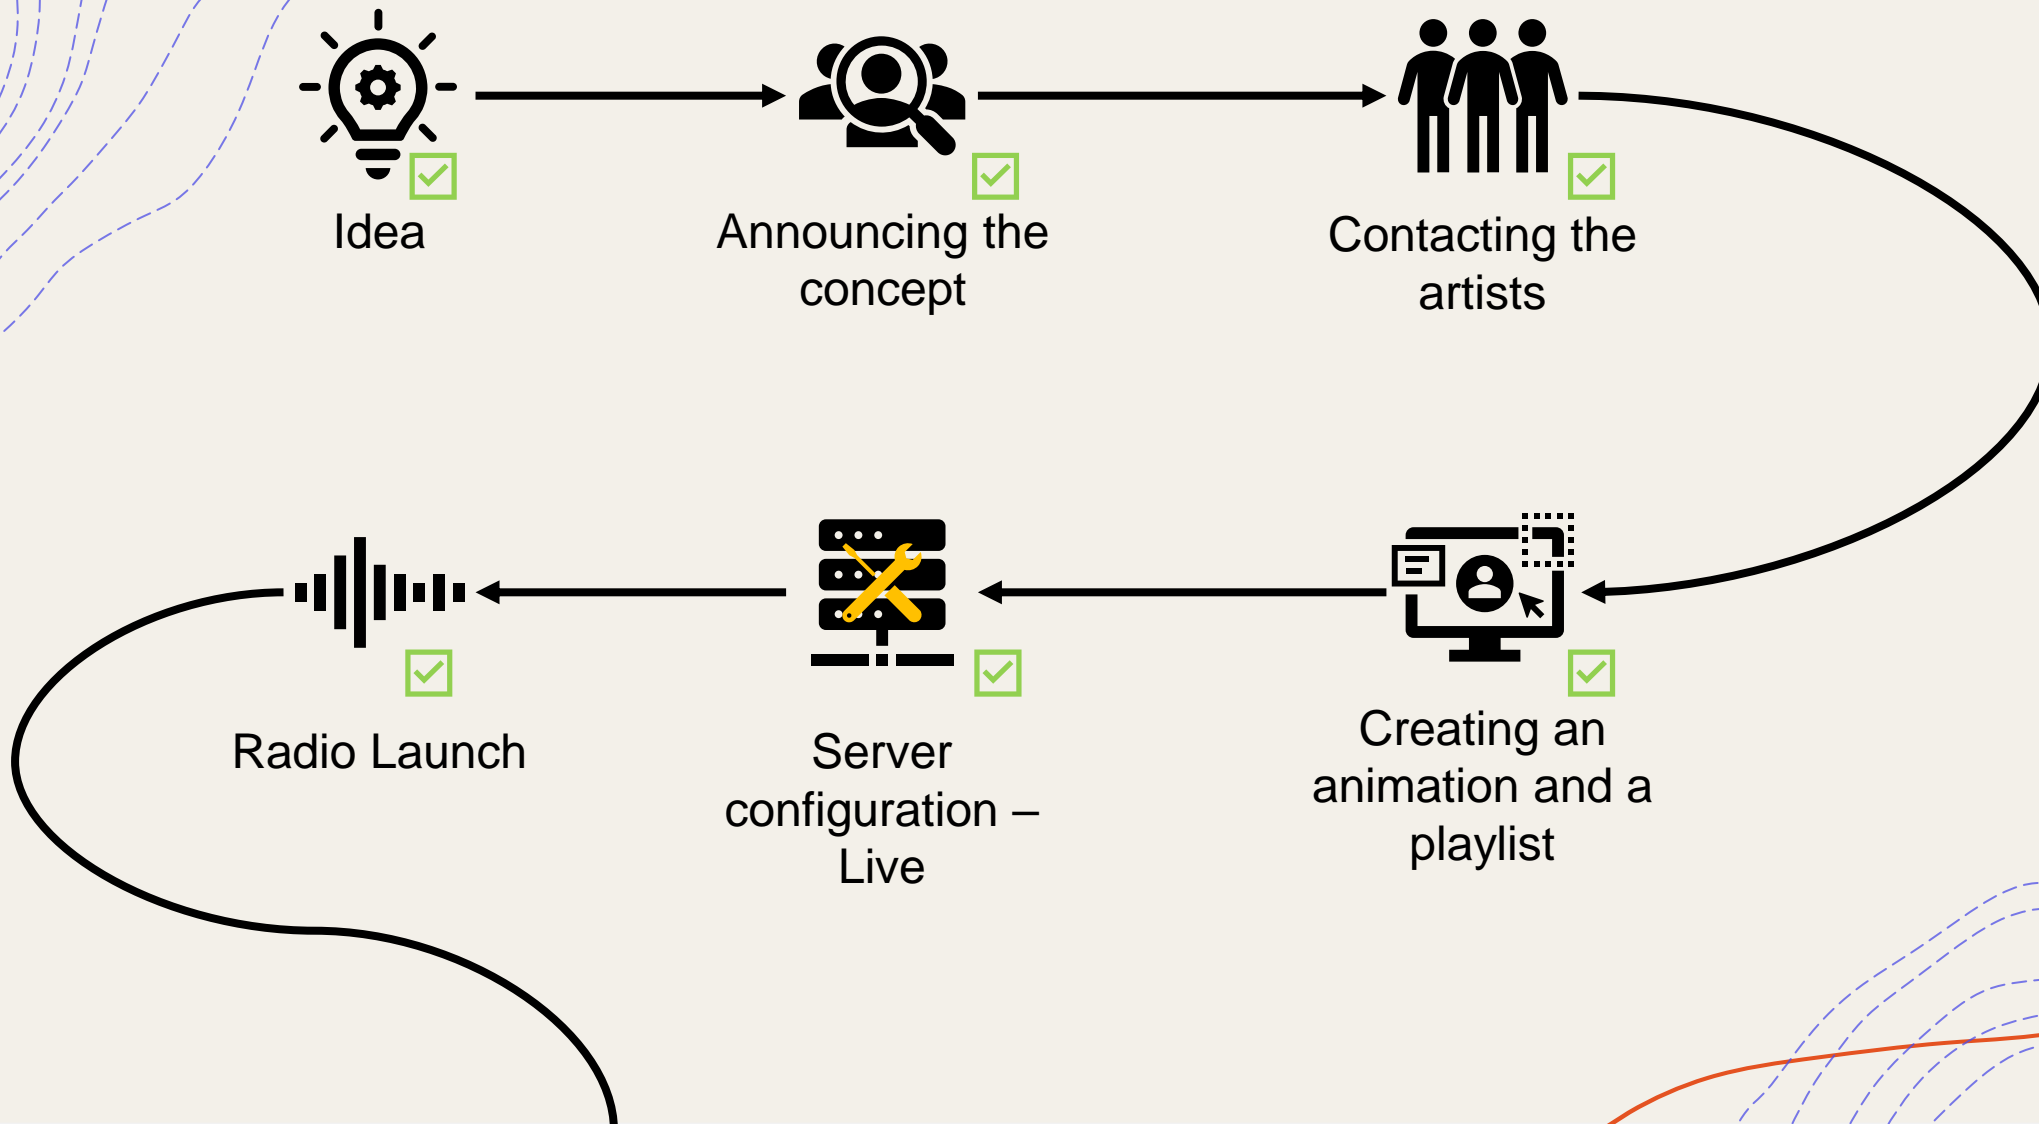

02

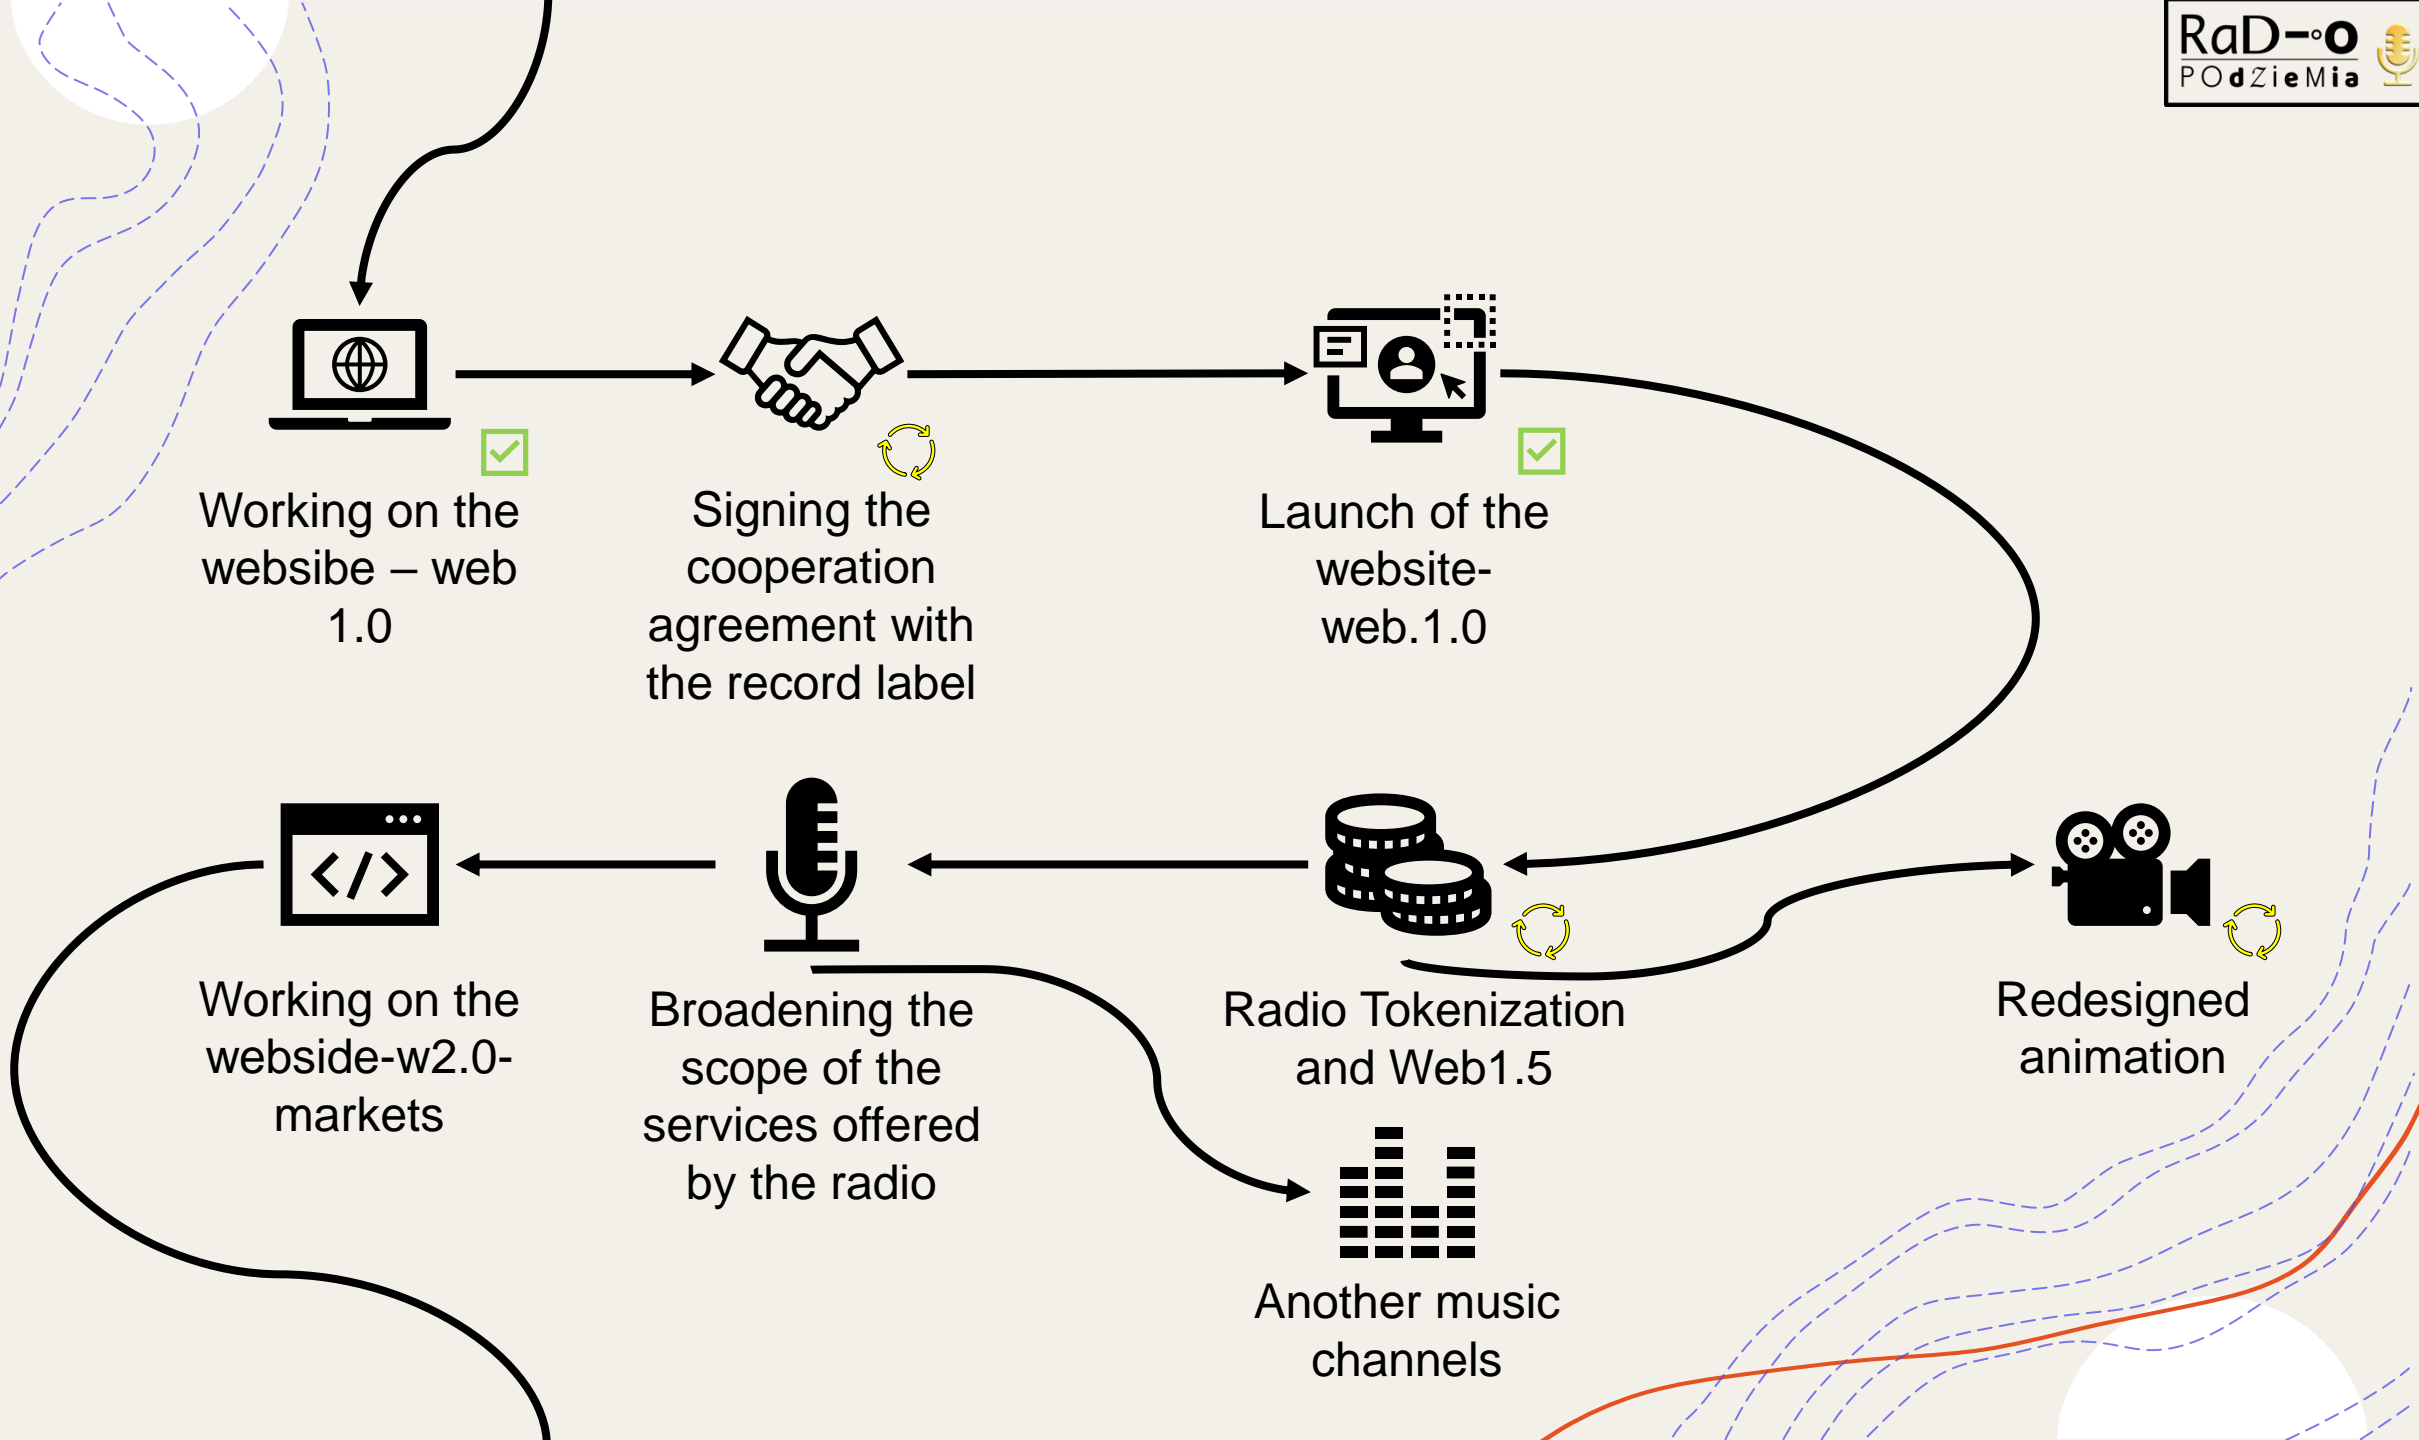

DeFM Platform

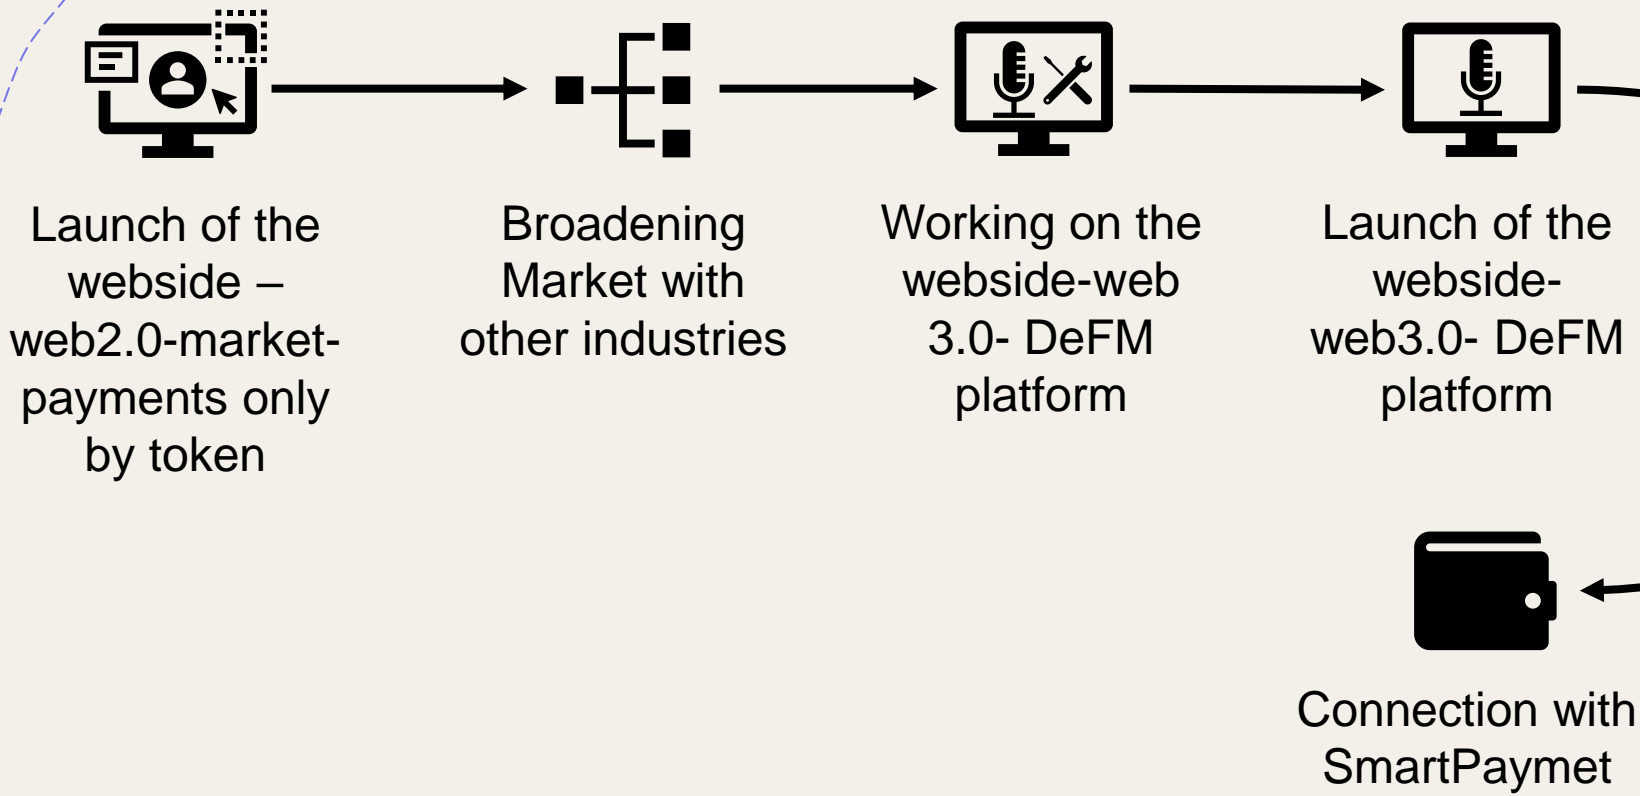

Launch of the first decentralized radio on blockchain

Roadmap

Selling MC token in Sapiency

Selling	Date	Amount	Price
1 Phase*	11/01/2021	2500000 MC	\$0.04
2 Phase	25/02/2022	1250000 MC	\$0.08
3 Phase	08/04/2022	833333 MC	\$0.12
4 Phase	22/05/2022	625000 MC	\$0.16
5 Phase	06/07/2022	500000 MC	\$0.20
6 Phase	20/08/2022	416666 MC	\$0.24

*The first Mctoken sale will enable working on Web2.0. website.
Terms, conditions and privacy policy of the project falls under Sapiency application.
